

**LEADING GLOBAL HEDGE FUND
GROUP FINANCE ACCOUNTANT
UP TO £65,000 + BENEFITS**

THE COMPANY

Our client is a leading international hedge fund of funds group, dedicated to maximising hedge fund opportunities and rewards for its global institutional client base, which includes market leaders in insurance, pension funds, asset management and banking. The Group has experienced considerable international expansion and has over 200 employees globally with offices in the world's key financial centres. They currently manages \$13.0 billion, making it one of the largest hedge funds in the world.

THE OPPORTUNITY

As a result of this considerable expansion, they currently have a very exciting opportunity to join their finance team team. Working very closely with the Director of Finance, you will be responsible for managing the group reporting team (which, in turn, is responsible for providing senior management with periodic consolidated information for internal use, and also meeting the group's external reporting requirements). On top of this you will be responsible for the budgeting and forecasting requirements, as well as the regulatory reporting, tax and treasury functions.

YOUR PROFILE

You will be a fully qualified accountant (ACA, ACCA or CIMA) with experience of working within the financial services market (Asset Management would be ideal). With a sound knowledge of UK GAAP, IFRS and FSA reporting, you will be looking to get into a senior finance role in one of the most prestigious hedge fund of fund companies in the world. There will also be some scope to get involved in improving reporting systems so any experience of CODA would be a distinct advantage.
