

## **UK Financial Controller - Leading Asset Manager**

**Up to £85,000 + Bonus + Benefits**

### **THE COMPANY**

Our client is a leading asset management group with a truly global presence, which combines the advantage of a worldwide presence and scale, together with local knowledge and service.

They have been managing assets on behalf of their clients for more than 30 years.

As one of the world's leading emerging markets asset management businesses, they aim to provide unique insights, investment opportunities and access to service excellence worldwide.

### **THE OPPORTUNITY**

Reporting into the Global Financial Controller, this is a very high-profile role managing a team of 5 staff in the London office.

You will be responsible for all of the reporting outputs for both the asset management and alternative investment businesses on a global basis.

Typically this will involve the management, financial, statutory and regulatory reporting requirements.

### **YOUR PROFILE**

You will be a fully qualified accountant (ACA, ACCA or CIMA) and have experience of managing a finance function.

Ideally you will have also had involvement in managing a global consolidation process and have strong management and financial reporting skills.

It is also likely that you will be coming from a financial service institution as there will be FSA reporting responsibilities.

Given the senior level of this role you will also need excellent interpersonal skills and the desire to add value from day one.
